

Welding Services

UKAS Type A Inspection Body

InCon Welding Services believes in offering a comprehensive range of services aimed at providing a total quality solution to the fabrication, welding and in-service inspection industries.

Our team of qualified specialists are based throughout the UK and are dedicated to providing a selection of services including inspection, non-destructive testing and pre-auditing services to ensure customer's welding requirements are met as specified by design and welding codes (i.e., EN ISO, BS, ASME, international and client requirements).

The basis is in welding and joining technology. Over the years our staff have proven to be dependable in developing and encouraging the adoption of new techniques and best practice.

Let us show you how Welding Services from InCon can meet your expectations and offer a comprehensive, total quality solution. Contact us to find out more.

Additional Benefits to Our Clients

✓ One Stop Service

Dealing with one organisation.

✓ Responsiveness
